

CONTRIBUTORS

DARBY CAMERON is a Policy and Program Analyst with the Rural BC Secretariat, a division of the Ministry of Community and Rural Development. In 2009 he submitted his thesis, *An Agent of Change: William Drewry and Land Surveying in British Columbia, 1887-1929* <<https://dspace.library.uvic.ca:8443/handle/1828/1608>>, to the Department of History at the University of Victoria and received his Master of Arts. Darby lives in Victoria but still considers Gabriola Island, where he grew up, as home.

ALISON J. EAGLE is Research Scientist at Duke University (North Carolina), formerly based at the University of Victoria. With an interdisciplinary background in agricultural economics and policy, soil science, and agricultural extension, her research interests include economic and policy issues related to agricultural land management, and interactions between agriculture and the environment.

SHARON FORTNEY recently received her doctorate from the UBC Department of Anthropology. An applied anthropologist, she works primarily with local museums and Coast Salish communities. Recent projects include: *S'abadeb* for the Seattle Art Museum and the Coast Salish gallery in MOA's new Multiversity Galleries. She is currently working as a Guest Curator for the North Vancouver Museum and Archives on the *Entwined Histories* exhibit.

KATHARINE MCGOWAN is a doctoral candidate in Canadian History at the University of Waterloo. Her doctoral research focuses on home front aspects of Native peoples' participation in the Canadian war effort during the First World War. She is completing her dissertation with

the help of a SSHRC Bombardier Graduate Scholarship and under the supervision of Dr. Ken Coates.

TRACY STOBBE is an assistant professor in the School of Business at Trinity Western University. She received her PhD in Economics from the University of Victoria. Her research centers on agricultural land and activities in the urban fringe, including the study of the factors that affect farmland values, the strategies employed by farmers in this zone, and the externalities and opportunities that persist in the urban fringe.

G. CORNELIS VAN KOOTEN is Canada Research Chair in Environmental Studies and Climate and Professor in the Department of Economics at the University of Victoria. He is also appointed in the Department of Geography, affiliated with the university's Institute for Integrated Energy Systems, and director of the Resource Economics and Policy Analysis (REPA) research group in the Department of Economics. Recent publications have been in the areas of renewable wind and biomass energy, wildlife conservation and the protection of agricultural lands. He is co-author of *The Economics of Nature* (Blackwell, 2000) and *Land and Forest Economics* (Edward Elgar, 2004).
