

CONTRIBUTORS

COLE HARRIS is an emeritus professor of geography at UBC and the author of many books and articles on early Canada, among them *The Reluctant Land: Society, Space, and Environment in Canada Before Confederation* (2008) and *Making Native Space: Colonialism, Resistance, and Reserves in British Columbia* (2002), both published by UBC Press.

RYAN DICKIE completed his Bachelors of Arts in Archaeology at Simon Fraser University in 2007 and is currently engaged in graduate studies at SFU. His research interests include Interior Plateau archaeology, lithic technology, landscape use, settlement-subsistence organization, and the development of social complexity.

JAMIE HOSKINS is currently completing undergraduate degrees in anthropology and archaeology at Simon Fraser University with a focus on First Nations governance and policy in British Columbia. When not studying, Jamie is employed as a vocational counsellor with Chilliwack Community Services where he provides advocacy and support to marginalized, socially isolated, and multi-barriered members of the community.

MICHAEL KENNEDY is a retired geography teacher living actively on a ridge south of Lillooet in the middle canyons of the Fraser River. He is the fifth generation of his family to live out their lives there in intimacy with these dramatic landscapes.

JESSE MORIN received his BA from SFU Archaeology in 2002, his MA from UBC Anthropology in 2006, and is currently a PhD candidate in UBC Anthropology. His research focuses on the prehistory of the

Pacific Northwest, most particularly on stone tools. The topic of his dissertation is the production, use, and exchange of jade artifacts in the pre-contact Pacific Northwest. He has published recent articles in the *Canadian Journal of Archaeology* and *The Midden*, and has recently returned from studying use-wear analysis on stone tools at the Russian Academy of Science in St. Petersburg.

JOANNA REID is a PhD candidate in the UBC Department of Geography with a long-term interest in environmental politics in British Columbia. Her PhD research focuses on the social conflicts over grasslands in the Cariboo-Chilcotin. Specifically, she is studying unique intersections of ranching, conservation, and Aboriginal title in the Middle Fraser, a spectacular grassland landscape along the Fraser River between Lillooet and near Williams Lake.

TAKASHI SAKAGUCHI completed a PhD at the Kokugakuin University. His research has focused on Japanese and British Columbia archaeologies, particularly prehistoric hunter-gatherer studies. His recent publications include the “Refuse Patterning and Behavioral Analysis in a Pinniped Hunting Camp in the Late Jomon Period” published in the *Journal of Anthropological Archaeology* 26 (1).

JOHN THISTLE is a PhD Candidate in the Department of Geography at the University of British Columbia. His dissertation examines the environmental history of pest control in British Columbia grasslands.
